ROOM 108

index

OF EDITORIAL CONTENT — 1st HALF 1957

How to Use this Index

Every article appearing in Business Week during the first six months of 1957 is comprehensively indexed in this volume. All articles are indexed alphabetically by subject and by the names of individuals, private businesses and government agencies in all cases where such were either the subject of the story reported or had a primary relationship to the topic covered. The following paragraphs are offered as a guide to the index.

Business Organizations. Industries are indexed under their simple designations such as: "Aviation," "Shipbuilding," "Textiles," etc. In addition, all articles having reference to a private company, will be found under that company's name.

Labor. General labor news is indexed under such broad headings as "Wages," "Employment," "Labor," and the like. Reference should also be made to the various government labor agencies and to individual companies. Because the full names of many trade unions are not generally well known, trade union items are indexed by parent organization, under "AFL-CIO," or "Independent Unions," and then in turn under subheads by the trade or industry in

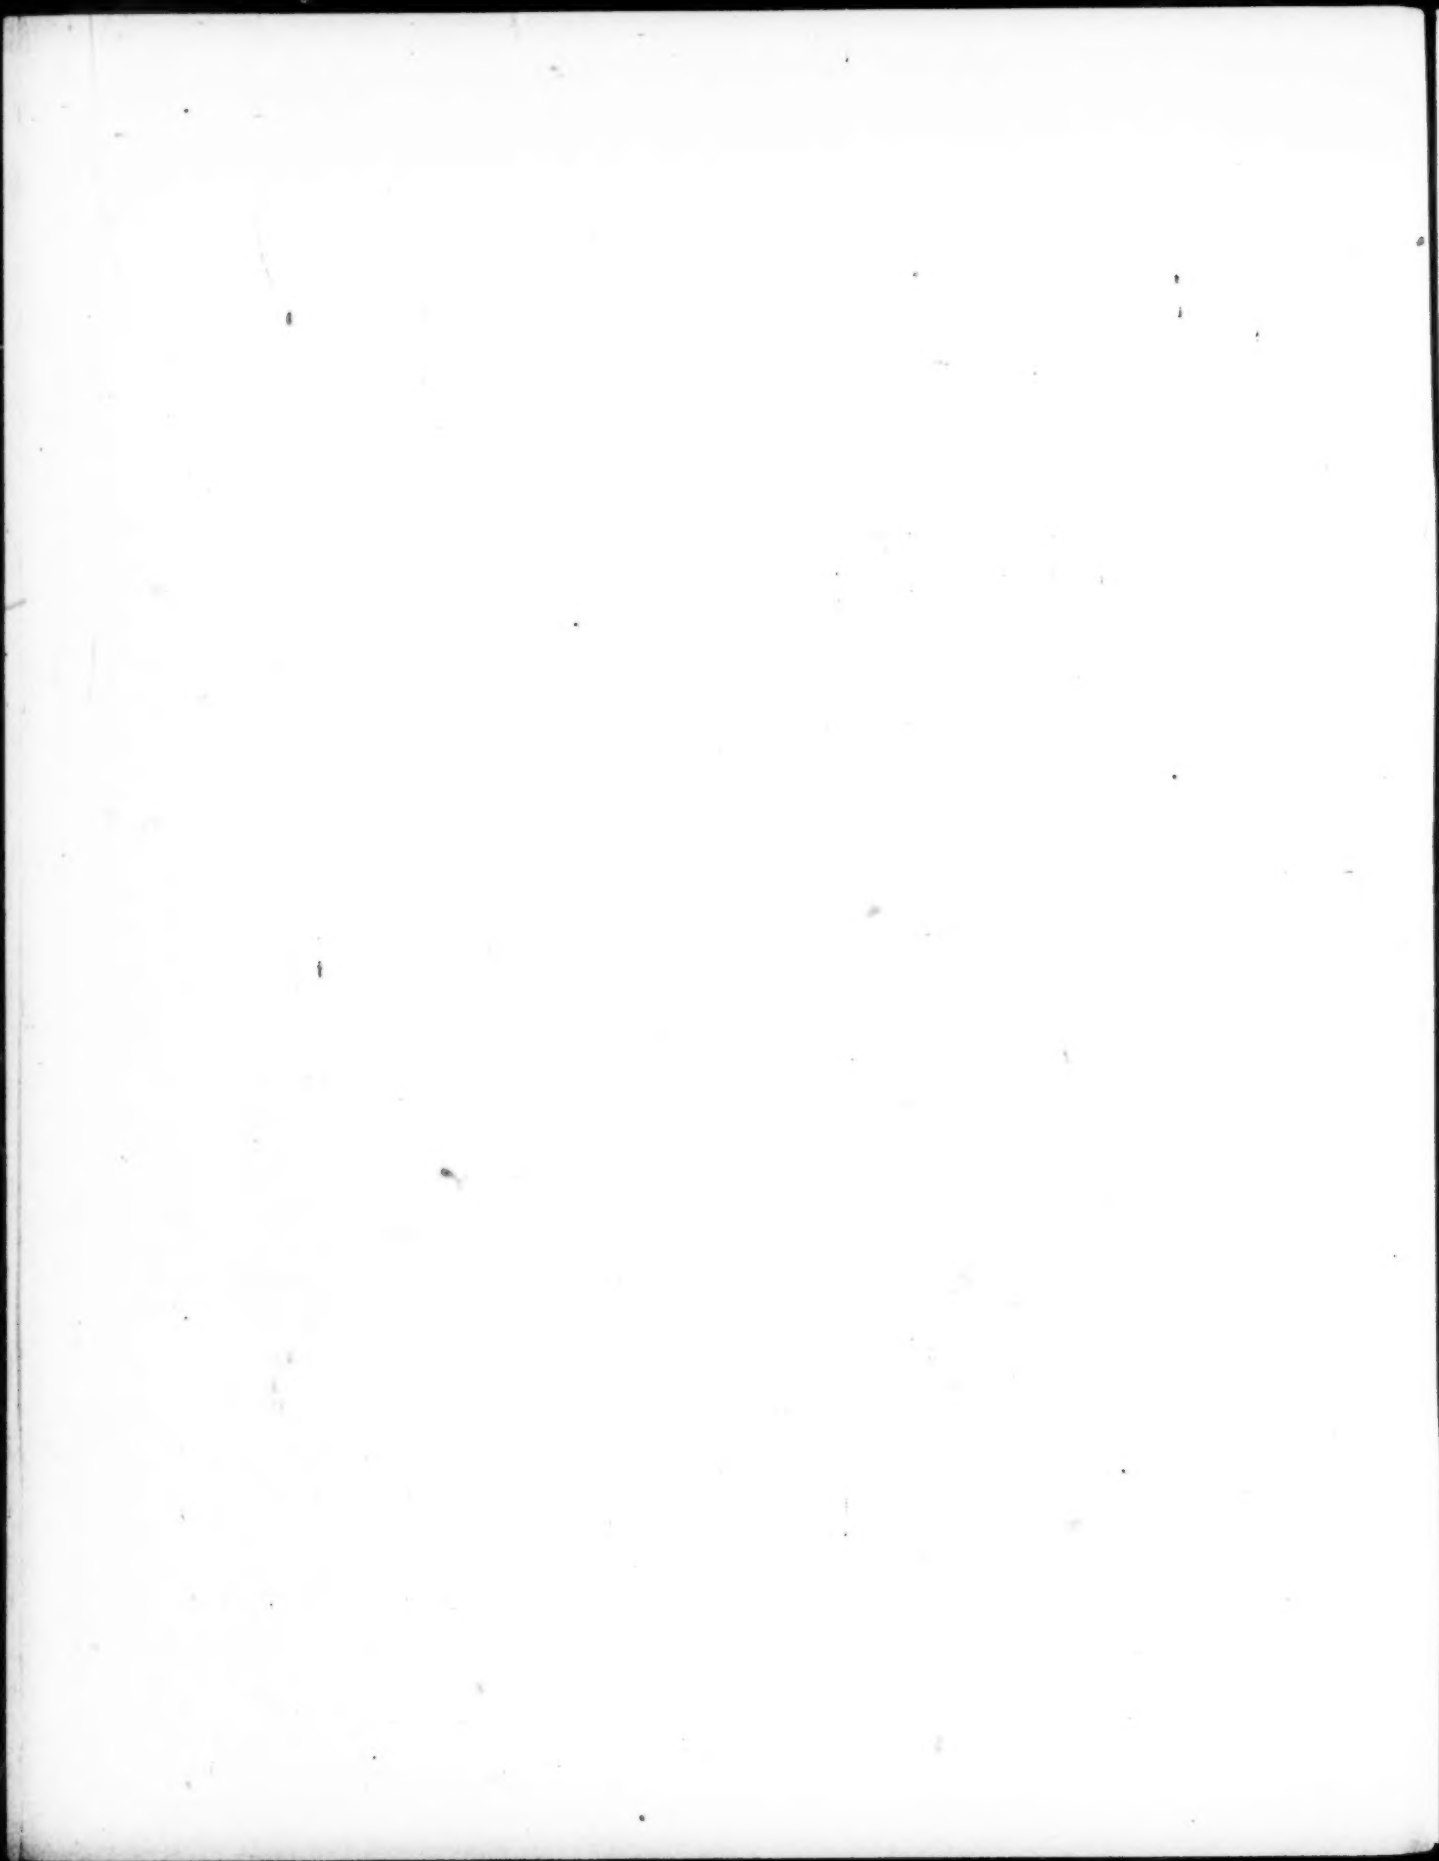

which they operate. There is one exception: the railroad brotherhoods are indexed only under "Railroads—Labor."

Government. The permanently established departments of the Federal Government will be found under "D," "Department of the Treasury," "Department of Defense," and "Post Office Department."

Independent Commissions and Special Emergency Agencies. These will be found arranged alphabetically by their established names. In addition, they are also indexed under their field of activity.

Reference Dept. Many individual headings suggest other entries (See also . . .) which may be consulted in looking for specific articles. If, however, you cannot find a specific article, or you would like any general information about material which Business Week has published, do not hesitate to make direct inquiry by mail or telephone to Business Week Library, 330 West 42nd Street, New York 36, N. Y.; telephone LOngacre 4-3000, extension 8297.

DISARMAMENT

Here's how U.S. officials rate the chances of Soviet agreement on specific arms limitation schemes p147, Apr.27

Washington hopes for progress in London disarmament talks. Figures Russians may be ready for at least token arms control p147, Apr.27

Russians announce their disarmament plans at London meeting p141, May 4

Washington is still hopeful that some limited agreement could be reached in London on arms control. The Soviet aerial inspection plan is open to negotiation p141, May 4

Disarmament negotiators in London are likely to agree on a "pilot project". This won't inhibit the missile race between the Soviets and U.S. p149, May 18

Final minimum U.S. terms for a small, first-step agreement toward disarmament are being hammered out in Washington. Harold Stassen holds meetings p149, May 25

New Phase in the Fight for Peace (Trend) p172, Jun.1

Stassen returns to London disarmament conference with comprehensive proposals from Washington on five major items. What he will offer the Russians p123, Jun.1

Why U.S. Hopes For Arms Break: It's only a cautious hope, but Washington banks on new Stassen terms, changed Soviet attitude (with 2 illus) p33, Jun.1

Uncary Peace Scare: Stock prices gave some ground as chances picked up for some limited disarmament p55, Jun.1

In terms of reducing the danger of war, the real test will come over aerial inspection p147, Jun.8

The London talks won't produce any real disarmament—no reduction in the weapons that count. The missile race will go on p147, Jun.8

There is very little in reports that the London arms control talks have hit a snag over U.S. differences with our NATO allies p144, Jun.15

The arms control talks in London are moving ahead. Pres. Eisenhower has virtually accepted the Soviet proposal to halt testing of large atomic weapons for a trial period of two years p145, Jun.22

New Optimism, and a Third Force p39, Jun.29

U.S. officials are just beginning to think about the economic impact any sort of first-step arms control agreement would have on American industry p141, Jun.29

GREAT BRITAIN

Under the political surface in Britain there are signs that a real shakeup may be coming in the Conservative party—one that will put young Tories in charge p87, Jan.5

Important policy decisions for the new government are: A big cut in defense spending, a reduction in the bank rate, free trade with Europe, and repair of Anglo-American relations p137, Jan.12

Sir Anthony Eden retired this week as Prime Minister of Britain p137, Jan.12

Britain now has a government that believes in European economic unity p148, Jan.19

Trimming Down Britain's Role: Macmillan and his aides will stress economic solvency to compensate for the country's declining political fortunes (with 2 illus) p34, Jan.19

Government hopes to cut defense burden by closer cooperation with the U.S. in guided missile research and production. Duncan Sandys goes to Washington p155, Jan.26

Sentimental Token (Trend) p144, Feb.2

U.S. British defense talks are going well. British-developed missiles may be produced in U.S. p163, Feb.2

Look for an early drop in the British bank rate p156, Feb.9

The first installment of Britain's defense cuts can be expected this month p156, Feb.9

The Rising Price of Peace: Duncan Sandys talks weapons aid with U.S. Defense Secy. Wilson (with illus) p25, Feb.9

Last week's drop in the British bank rate is being described as a technical adjustment p156, Feb.16

Suez Starts a Rush of Migrants: Crisis in Europe sends Canada a wave of British migrants (with 4 illus) p185, Feb.23

Government hopes to offer Britons an incentive budget in April, with some tax relief p134, Mar.2

Britain spends 2% of GNP on research and development, compared with 1½% in the U.S. p124, Mar.23

Mid-East Clouds in Bermuda Sky: Tensions from Middle East are a recurring theme in talks between Eisenhower and Macmillan p46, Mar.23

Britain Clings to Fading Power: With trouble at home and in its world markets, the country is down to a secondary role in international affairs (with illus) p41, Mar.30

IMF Wins Over the Skeptics p86, Mar.30

ZIRCONIUM

Reactive Metals and National Distillers join forces to set up a new zirconium plant # p167, Mar.2

index

OF EDITORIAL CONTENT — 2nd HALF 1957

How to Use this Index

Every article appearing in Business Week during the last six months of 1957 is comprehensively indexed in this volume. All articles are indexed alphabetically by subject and by the names of individuals, private businesses and government agencies in all cases where such were either the subject of the story reported or had a primary relationship to the topic covered. The following paragraphs are offered as a guide to the index.

Business Organizations. Industries are indexed under their simple designations such as: "Aviation," "Shipbuilding," "Textiles," etc. In addition, all articles having reference to a private company will be found under that company's name.

Labor. General labor news is indexed under such broad headings as "Wages," "Employment," "Labor," and the like. Reference should also be made to the various government labor agencies and to individual companies. Because the full names of many trade unions are not generally well known, trade union items are indexed by parent organization, under "AFL-CIO," or "Independent Unions," and then in turn under subheads by the trade or industry in

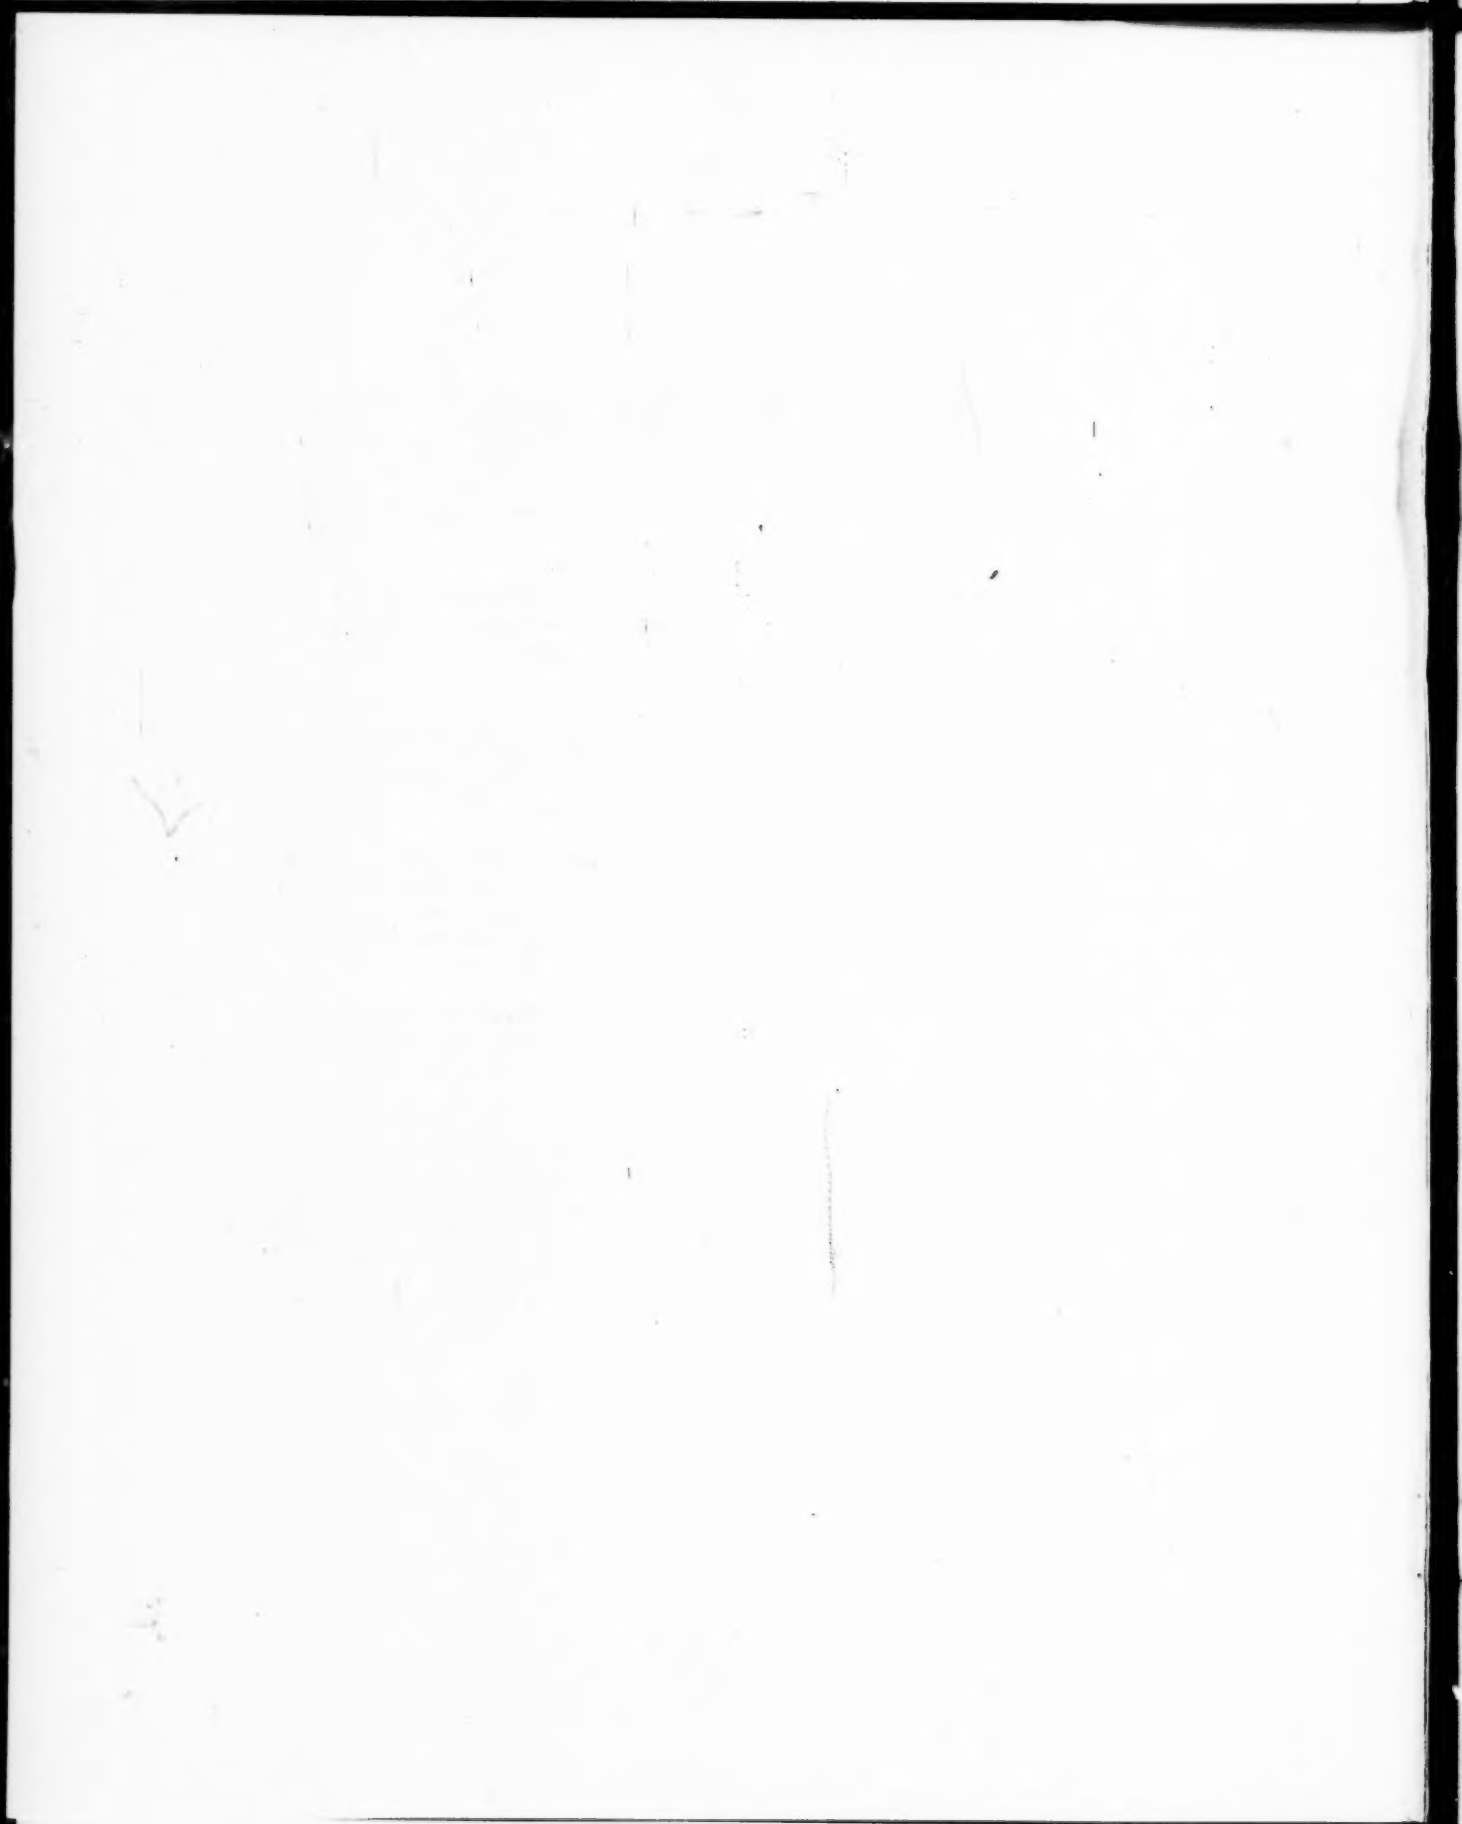

which they operate. There is one exception: the railroad brotherhoods are indexed only under "Railroads—Labor."

Government. The permanently established departments of the Federal Government will be found under "D," "Department of the Treasury," "Department of Defense," and "Post Office Department."

Independent Commissions and Special Emergency Agencies. These will be found arranged alphabetically by their established names. In addition, they are also indexed under their field of activity.

Reference Dept. Many individual headings suggest other entries (See also . . .) which may be consulted in looking for specific articles. If, however, you cannot find a specific article, or you would like any general information about material which Business Week has published, do not hesitate to make direct inquiry by mail or telephone to Business Week Library, 330 West 42nd Street, New York 36, N. Y.; telephone LOngacre 4-3000, extension 8297.
